

Learning Outcomes:

- I will demonstrate my understanding of JAVA programming to create an application that will convert number from decimal (Base-10) to any other other number system.

Warm-Up Assignment:

- N/A

Review of Prior Knowledge:

- Algorithm for converting from decimal (Base-10)

Introduction to New Material: (I Do)

- N/A

Guided Practice: (We Do)

- N/A

Independent Practice: (You Do)

- Team Programming Simulation to Solve Problem

Standards/Expectations:

c.K.P.: demonstrate the ability to count, convert, and perform mathematical operations in the binary and hexadecimal number systems;
